

Preparation Worksheet

	SELF	OTHER*
PRIORITIZED INTERESTS & POSITIONS	#Garner support for Harborco's proposal and eventually get it passed #Appease the union workers on issues that make their vote lean towards Harborco. - Aim for union quota 2:1 given that you have at least 1 billion - If no federal funding, amke sure to ask for unlimited union preference #Keep in mind environmental concessions to preserve economic profitability - Aim to get 8 points (Clean/dirty) although this may be my bias. Still I expect that many parties will be very against "primarily dirty" - 8 points as well for maintaining and repairing the setting, but definitely try for some harm to ecological setting #make sure substantial loans are provided by DCR - Settle for 1 billion but aim to get 3 billion. - 2 billion means we can make all other issues concessions #Maintina relations with others states and governors while still minimizing the amount to pay to them - I think aim for no compensation but let others take the lead on that issue. Otherwise don't go higher than 300 million	PREDICTIONS # Harborco: dirty industry, harm to ecology, no union preference, 3 billion loan, no compensation to other ports # Environmental League: clean industry, no harm to ecology, I'm assuming some union preference, no loan (doesn't want it to be built), assuming medium high compensation to other ports #Unions: no preference for environmental concerns likely (or maybe mid level concern), HIGH union preference, large loan conditional on union preference, likely no compensation to other ports conditional on union preference #Other ports: no preference for environmental concerns likely, some union preference depending on how they operate themselves, medium loan, high compensation. #DCR: clean industry, no harm to ecology, some union preference, small to no loan, medium compensation to other ports

BATNA	30 points according to the scoring sheet	
RESERVATION PRICE	30 points!!!! I think I'm okay with this being the same as my BATNA given the writeup.	
TARGET/ASPIRATION	77/100 points	
WHAT IS YOUR OPENING MOVE? INITIAL STRATEGY AND CONTINGENCY PLANS: Honestly, I hope to take a back seat at the beginning of negotiation given that Harborco needs 4/5 votes to build and I get 30 points either way. Furthermore, I want the port to be built, so in the end, if I have less of a say, that is fine with me. Still, I want to make sure that through gathering information and interests and positions from other parties, I want to tally up how much of their positions can make up my minimum 30 points. Some of my contingency plans are listed above. Overall, I want to be diplomatic. I want the port to be built, but I also want most other parties to be happy (it seems). I am playing to emotion (for other states), profitability (for Harborco), and political support (unions).		

*Other refers to what you think your counterpart's interests, positions, etc., are.

Terminology:

Position: What you say you want

Interest: Why you want it

BATNA: Best Alternative to a Negotiated Agreement -- your plan if no agreement is reached

Reservation Price: The worst deal you are willing to take

Aspiration level: Your ideal outcome
